Внимание! Во избежание заклинивания механизма не устанавливайте заглушки винтов и эксцентриков над направляющими!

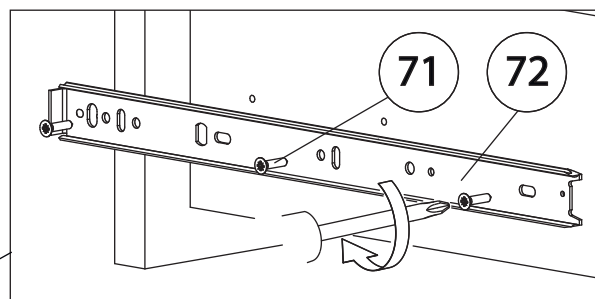

Схема установки шариковых направляющих.

Для установки шариковых направляющих в изделие необходимо разъединить их на две части. Широкая часть устанавливается на боковую стенку каркаса, а узкая на боковую стенку выдвижного ящика. Разъединение производится путем нажатия на пластиковый рычажок при выдвижении узкой части направляющей (смотри рисунок). Если направляющие крепятся на одной боковине с двух сторон, то саморезы необходимо крепить в разные отверстия направляющей. Для регулировки выкатных ящиков по высоте необходимо крепить узкую часть направляющей через ее овальные отверстия.
